Создать функцию, которая вычисляет средний фрахт по заданным странам (функция принимает список стран).

```
CREATE OR REPLACE FUNCTION avg_freight(VARIADIC countries varchar[]) RETURNS real AS $$

DECLARE
        sum_freight real;
        counter int;
BEGIN
        sum_freight := (SELECT SUM(freight) FROM orders WHERE ship_country = ANY(countries));
        counter := (SELECT COUNT(freight) FROM orders WHERE ship_country = ANY(countries));
        sum_freight := sum_freight / counter;
        RETURN sum_freight;
END;
$$ LANGUAGE plpgsql;

SELECT * FROM avg_freight('USA', 'Germany');
```
